

**Subject:** Spontaneous application – Software Engineering Internship 2027

Dear Vincent,

My name is Jordan LAVENANT, and I am a second-year Computer Engineering student at Polytech Paris-Saclay in France. I am currently looking for a 9 to 12-week internship abroad starting from May 31, 2027, and I would like to submit my spontaneous application to TowSoft. I have been working as a Full-Stack Web Developer apprentice for the past two years, which has given me the opportunity to work on real-world projects, collaborate within a team and adapt to professional environments. Through this experience and my studies, I have developed both my technical skills and my ability to work on projects from their requirements to their development, while working closely with other team members.

The internship can start from May 31 and must last a minimum of 9 weeks and a maximum of 3 months. I will need to return to France at the end of August, as my academic year starts in early September. There are no specific requirements regarding the type of assignments, as long as they are related to computer science. Please find attached my CV and cover letter for further information about my profile and motivation.

Thank you for your time and consideration. I would be happy to provide any further information if needed.

Kind regards,

Jordan LAVENANT
